'Its good but its bad in battery condition and its has heating issue.\n\nThis mobile is not for heavy mobile user like\n\nThis is ok for professional person.\n\nThis is for average mobile user\n\n\nWho have this mindset (brand and society remarks are important)\n\nSo go for 🍏\n\nOtherwise there are lot of mobiles available with advance technology and with comfortable and better user interface',
'To,\n\nDear Flipkart Team, I hope this email finds you well. I am writing to bring to your attention an issue I encountered during my recent access to Urly on 25th September 2024 through my Plus membership. On the night of 25th September, I eagerly awaited the bigbillion sale and placed an order for an iPhone 15 using my HDFC credit card. However, despite multiple attempts, the order did not go through. I eventually made the full payment via Google Pay, but noticed discrepancies in the amount ch...',

'After 4+ months.\n\nCons:\n\n1. Still heats eats up a lot!!!\n\n2. Wifi connection is very poor in this model, it fails to connect most of the time automatically where I manually need to search and join the wifi and then again it automatically disconnects. I have an iPad air which works fine, maybe it's a range issue.\n\n3. My keyboard switches automatically from Microsoft SwiftKey to stock ios keyboard. Idk what's the issue??\n\n4. 'A very good product and also loved it',

"Probably best phone to buy under 53k\nOverall good balanced phone\nBeing a ios device it'll never give you the fun of an Android device. Buy only if you want it for professional reasons",

'Battery only drain fast\nBattery health 98 at two month\nBut worth',

"Design The iPhone 15 has a satin-finished design and a durable glass panel on the front.\nDynamic Island The Dynamic Island helps with multitasking.\nIP68 ingress protection The iPhone 15 can withstand being submerged in up to 6 meters of fresh water for 30 minutes.\nStereo speakers The iPhone 15's stereo speakers are loud and have good sound quality. The battery life is lower than expected draining very fast and as usual heating issues there.",

"Initially I missed 120 Hz screen refresh rate after switching from Mi 11x pro to iPhone 15. It been a month using iPhone 15, accordingly to my experience, unless you want to purchase more apple products like Mac book, apple watch etc. it is not smart decision to buy iPhone. But I surely appreciated its small form factor and less weight. Battery backup is also good.",

'Phone is great.',

'Phone is good. Good battery backup , upgraded camera.\nBut I feel refresh rate should be 90hz atleast.',

'The only thing I like about this phone is the camera quality and that is the reason I bought this phone.\nI already have an Android phone which is less than 50% of its price and still is better in every aspect except the camera.\nWell! Definitely, iPhone 15 has a flagship level chipset but I am not a gamer and a normal user and I find mid range and flagship all perform at similar level in daily tasks.\nWhile iPhone 15 only has 60hz screen which feels choppy, all other phones have 120-144hz screen...',

'Too much heat when camera used',

'The best part of camera is cinematic video which is fabulous. Rest of the things are good, but cinematic mode is on next level, higher rate is missing which may hurt phone noise cancellation is on. Also next level. Some small small features which make sweet point to use and make it different from android efforts of making iOS and developing some sweet sweet things are appreciable and if you have MacBook or iPad, ecosystem work, fantastically the best things for this iPhone is much much better...',

'Nice product. The look of the phone is awesome 🥰. Great to have the iPhone black color.',

'First time experiencing iPhone. It feels premium and quality is awesome love it ❤️❤️❤️',

'I have both Galaxy S23 and iPhone, Galaxy is taking 9/10 good photos compared to iPhone 7/10 photos. iPhone only shine on video.\nFor better photo buy Galaxy S23\nBetter video go for iPhone.',

'I am an iPhone user since long. I have bought this YELLOW colour. But really feel that Apple should rethink and rename this colour as GOLDEN YELLOW, its edges are slightly on the Golden side as you can see in the pics. Additional feature as compare to iPhone 13, this has Dynamic Island and camera is superb 🥰 I am using it for 5 hrs daily, not facing any heating issue as such.',

'I have moved from android to iOS, iPhone 15 is really a good device, fulfills all

1 the basic things that needed at daily life\n\nJust a note for the battery consumption, it drains a bit fast',

'Camera is best quality',

"I recently purchased the iPhone 15 from Flipkart, and I'm thrilled with my experience. The sleek design and vibrant display are stunning, and the performance is top-notch with its powerful A16 Bionic chip. The camera quality is exceptional, capturing detailed and vivid photos even in low light. Battery life has been impressive, easily lasting a full day with heavy use. Flipkart's delivery was prompt, and the packaging was secure. Overall, I'm extremely satisfied with my purchase and would highly recommend it.",

"Upgraded from iPhone 11. worth buying it. here are some pros and cons.\nPros:\n1) Smooth, constant software update,\n2) 6 GB RAM, 1 day easily sustainable battery life\n3) extremely helpful if you are in apple ecosystem.\n4) 48MP camera is really great if we compare with my iPhone 11's 12 MP. Best video quality.\n5) don't go for 15 plus or pro model even if you have enough money. but 128 GB base model with in 65000 RS and use that extra money to buy MacBook AIR or airpod 3rd GEN.\nCons:\n1) 60Hz display...",

'All good in this camera superb',

'Excellent purchase battery life is good for medium usage but can get you through the whole day on single charge. Am just loving this phone',

'Amazing Camera and battery',

'Excellent product',

'The product is good. Price is excessive due to Apple branding only. Battery backup is not up to expectations. Flagship Titanium is lacking in it which is available in pro models only. At this price the screen should have been 6.8 inches at least.',

"I can say the 60hz doesn't feel 60hz it is very smooth and may be because of apple\nI was too worried about the 60 hz because I was switching from 120hz Android (realme GT master edition) to this one but after using iPhone 15 I feel lags in my android 120hz\nBut I feel camera quality is avg but videography is next level\nLove the speaker\nQuality of display is just wow\nCharging is also quite good and battery backup is also awesome\nI am getting 5-6 hr gameplay (free fire+bgmi) from 10% to 25% quickly...",

'Click the pic is amazing.',

'Awesome.\n\nCamera too good\nDisplay too good\nBattery Good\nFeels too good',

'Look and design very nice',

'ok',

'Love iPhone 15',

"Well, there is a little bit of heating issue there, not at charging but in general operations. From design perspective, dynamic island is horribly thick for a 6.1 screen. It could have been smarter if the look was a little bit slim. What stops apple to increase the battery capacity now a days is beyond explanation. The Chinese manufacturers have definitely done a phenomenal job in terms of both the battery and charging. There's no trade off there, it's a success for them. In software, the competition...",

'Perfect one to upgrade\nEdit after 7 months : No disappointments, build quality good as this has undergone few hard falls. Underwater also good. Camera quality is awesome. Battery is always an issue but it is okay for a person who uses 5-6 hours daily. Videos are also good in cinematic mode. Good update I bought it at 78k when launched. But around 65 it is a super deal to do at this time.',

"Almost good but the battery is overheating I don't know why and it drained very quickly this is one of the major issues in this phone otherwise all ok but not satisfied with the battery",

'Excellent',

"Amazing phone But\nNow days Chinese people drop Apple's brand value.",

'Very nice phone I'm happy very good 👍',

"Amazing. This is my second iphone after 11 pro.\nUsed it for 3 days till now. No heating issue. While setting up the device/updating ios/transferring data - it did n't heat at all. Smooth experience. Best buy for 2024.",

'Pros:\n1. Incredibly smart device this year\n2. iOS interface\n3. Data Privacy\n4. Premium build quality\n5. Dynamic Island\n6. Ecosystem benefits if you own other Apple devices\n7. Powerful processor\n\nCons:\n1. 60Hz refresh rate for a flagship (although not very noticeable)\n2. No improvements to Siri\n3. Expensive\n4. Low possibility of repair',

'Black colour is just awesome 🔥🔥',

'Everything is good. Battery backup is hardly 6hrs will come while continuously usage. Camera is fantastic. In this iphone 60 hz refreshing rate is equals to 120hz refresh rate in android. Very light weight.',

'A Mixed Bag of Brilliance\n\nThe iPhone 15 flaunts an impressive camera setup, capturing moments with exceptional clarity and detail. However, users may encounter heating issues post 80% charge, which could disrupt prolonged usage. Occasionally, screen touch glitches may hamper the otherwise seamless user experience. Despite these setbacks, the iPhone 15 excels in performance and features. The standout Dynamic Island feature enhances productivity and personalization. Overall, the iPhone 15 is a...',

"This phone are not only for show off, these are the real master peice for content creators and reels creators, All or good but camara will nailed it,the one and only negative is battery. That's all thankyou 👍",

'Battery is decent and Display,performance and Camera top notch 🔥🔥and overall value for money phone',

'Good one!',

'I am very happy with the service of Flipkart and product was very good.\nthanks Flipkart',

'All is well, but battery health is draining very fast.',

'My first iPhone and just love it ❤️',

"Perfect upgrade from 13.. An incredible device that delivers everything I could want. The design is sleek and lightweight, with the new Dynamic Island feature. The camera is a standout, photos and videos look professional with excellent low-light performance and vibrant colors.\n\nThe A16 Bionic chip ensures lightning-fast performance, whether I'm gaming, editing videos, or running multiple apps. Battery life is also impressive, easily lasting a full day with moderate use.",

"Best iPhone upgrade after the iPhone 14. I got this in Big Billion Day Sale for 53k. I'm reviewing this phone after 3 months.\n\nThe Camera and display quality is amazing. But I switched from a 120 Hz display android phone so it took me a while to adapt to this one.\n\nBut looking at a overall scenario it is a decent phone with clean UI. I've been liking iOS now and will definitely upgrade to iOS in future.\n\nThe battery is not upto the mark but it does the job pretty well.\n\nI liked the animations an...",

'Recently bought this phone and realized why Apple make the best phones in the world.\n\nOne of the most beautiful purchase I ever made 💙',

'Mashallah Great phone, last time brought iPhone 12 for face unlock with mask, this is worth upgrade planning to keep at least 3 years, thank you team flipkart for great offer',

'The iPhone 15 is simply amazing! The design is sleek, and the slightly curved edges make it feel great in the hand. The display is bright, sharp, and stunning, everything looks fantastic on it, whether watching videos or scrolling through photos. The camera upgrades are noticeable, especially in low light, and impressed by the

he level of detail in every shot. Performance is super smooth, with no lag even when running multiple apps.',

'Thanks to flipkart service nice open box delivery. iPhone 15 performance is great and so smooth. 👍👍',

'At the time of sale it was the best deal for me , intended to buy pixel 8 but went for iphone 15 was really worth it . Performance user experience camera design is undoubtedly excellent the only drawback is the battery life , which sustains for only 6 7 hours and in daily life have to charge 2 times . As a flagship phone it could be a better but nothing is perfect, without the battery issue in every aspect it is value for money.',

'Great',

'Great product and I would really recommend this device to anyone who wants to use a phone for a long time if Apple is making an expensive product then they will deliver a quality. I have been using the apple devices since 2009 till now. Awesome experience thanks to Apple. 🍏',
